

# AUXILION FLIGHTPLAN

## CLOUD TRANSFORMATION CONSULTATION

Looking to simplify your journey to the cloud? Want to discover the Auxilion cloud-first, mobile-first 'new world of work'? Book a FlightPlan© with our global award-winning transformation team, custom-designed for corporate and public sector.

**FlightPlan** is designed to give you an end-to-end view of your current IT infrastructure, explain how cloud technology can streamline your organisation and demonstrate how we can help you realise the potential of a transformation program.

### What is FlightPlan?

Cloud has become a ubiquitous term in the world of enterprise IT, yet many business people still want to know what value it can bring to their company. There is a huge amount of information available on the applications and benefits of cloud technology. However due to the complexities of an organisations ICT real estate it can be difficult to know where to begin when evaluating how it applies to your own unique situation. This is where Auxilion's FlightPlan comes in. Developed specifically to help organisations to cut through the noise, FlightPlan is a cloud consultation where our experienced team analyse your current IT environment and demonstrate how the latest in Microsoft cloud technology can streamline your business and help to achieve your goals and objectives.

### Key Benefits of FlightPlan

- Delivered by our global award winning team, with a proven track record transforming a diverse range of organisations.
- Held at our purpose-built FlightPlan facility at our headquarters in Sheffield and Dublin, or we can go to you – whichever is most convenient.
- We provide a document afterwards that details the outcomes of the consultation – this takeaway can form the basis of your IT strategy or simply be a reference for the future.
- Cost-effective way to evaluate cloud for your specific case. Ask the burning questions, and get an answer straight away!

Now all businesses have access to the same cutting edge technology as the largest global companies.

## Typical Challenges

One of the questions we get asked time and time again by clients – ‘What are the tangible business benefits of cloud?’ and ‘Where do I even begin?’

During the FlightPlan we outline exactly what benefits you will experience, but more than that we lay out a step by step guide on how to achieve them. This is why we call it a FlightPlan!

## Testimonials

Auxilion has been named as Cloud OS (Azure) Partner of the Year since 2012, and has recently been named as the Global Technical Presales Specialist by Microsoft. But don't take our word for it - here's what our FlightPlan attendees think:

*“Motorpark Group attended a Flight Plan session with Auxilion in order to decipher how we could ‘cloud-transform’ our business. The workshop provided us with invaluable insights into what cloud could do for our business. If you are considering cloud, I would recommend a session with the Auxilion team”.*

– Gerry Halloran, Motorpark Group

*“If you are looking to cut through all the cloud-clutter, I would recommend a session with the Auxilion team. We found their ‘Flight Plan briefing very beneficial - it gave us some great ideas on how we can best leverage cloud computing and cloud support for our organisation”.*

– Colin Boyle, IT Manager, Laois and Offaly Education and Training Board

## NEW: 3 ways to plan your flight!

1. **Pre-Flight:** 1-to-1 briefing or Webinar
2. **Test-Flight:** Move a workload to Azure
3. **Flight:** Deep-dive consultation & plan

## FLIGHTPLAN RE-FUELED:

3 new ways to plan your flight to the cloud, from simple consultation or webinar to enterprise-wide deep-dive.

Auxilion understands that every organisation is at different stages of their cloud consultation journey. Therefore we have created 3 flight plan options to help you get the best from FlightPlan based on your availability, timelines, commitment and workloads you wish to explore. We call them “Pre-Flight”, “Test-Flight” and “Flight-Time”.

1

### 1-to-1 consultation or webinar briefing

Pre-Flight

Our **Pre-Flight** briefing consists of a 2 hour workshop with our global-award winning team. This is a cost-effective way to evaluate cloud for your specific needs, without making a time-consuming commitment. Ask the burning questions and get an answer straight away! This is the perfect first step for companies planning their journey to the cloud and can be built upon further with Test-Flight or Flight-Time below.

2

### Proof of Concept with 1-3 workloads

Test-Flight

**Test-Flight** involves a half-day consultation meeting with our team. This can be held in our purpose built FlightPlan facility or on your site – whichever is more convenient. You then have the ability to choose up to three Azure workloads set-up as a proof of concept, giving you the opportunity to experience first-hand how it works. A Test-Flight usually requires a three-day commitment, half a day to meet with our team and three days to implement your proof of concept solution.

3

### Deep-Dive

Flight-Time

**Flight-Time** involves more time commitment from our team and yours where effectively we cover your entire ICT real estate, giving you the best plan to hybrid cloud services using the Microsoft Azure platform. Flight-Time can also build on your Test-Flight POCs and pilots through to full implementation and workloads rollout. All Flight-Time workshops include a heavy documented output of what your approach should be to ensure maximum impact.
